

Dust Free Blasting

A COST EFFECTIVE AND ENVIRONMENTALLY FRIENDLY SOLUTION FOR HORIZONTAL AND VERTICAL STEEL SURFACE PREPARATION

Airblast's answer to the increasing environmental requirements connected with blasting and painting incorporates a range of air and airless dust-free blast systems for weld-cleaning, structural steel, concrete floors, horizontal and vertical cleaning of large surfaces, such as steel plates, ship decks, hulls and tanks.

One man operation.

Easily achieves cleanliness levels of SA 2 ½.

Desired profil can be achieved by utilising different sizes of steel grit.

Unique features:

Specially designed for steel
Resistant against steel shot and grit.

Dust free blasting can achieve production rates of up to 50 square meters per hour.

Dust free blasting means painting or other process can be carried out at the same time.

Utilise steel abrasive – lowest break down rate of any blast media – 0.2 kg per square meter.

Airblast/EBE Portable Wheel Blast Cleaning Systems are the Surface Preparation Industry's most effective and environmentally friendly method of removing paint, coatings and other contaminants from steel surfaces. These machines are portable abrasive blasting systems designed to clean and profile horizontal surfaces in a efficient and dust free manner.

Dust free blast equipment is available in a variety of sizes to suit all jobs and pockets! All units supplied complete with automatic dust collector and connecting hose.

Portable/Stationary Abrasive Blast Equipment - Nozzles - Nozzle Holders - Hoses - Couplings - Lighting
Wetblast Equipment - High Pressure Waterjetting - Personal Protection - Blast Cabinets - Blastrooms
Vacuum Blast/Recovery Equipment - Portable/Stationary Wheelblast Equipment - Dehumidifiers
Pipe Cleaning/Coating - Air Treatment - Mobile Dust Collectors - Media - Paintspray Equipment
Plural Component - Measuring Instruments
