

The Airblast Can Crusher unit reduces all types of metal cans, tins, oil filter and pails up to 30 litres to up to **a sixth of their original size** with ease. Enabling not only cost savings on waste skip transport charges to landfill sites but also helps maintain a safer, tidier workspace.

Once an item to be processed is placed within the machine the joystick is depressed to start the approximate 20 seconds cycle, during which the door is locked by an automatic safety system.

Piercers vent any containers installed in the machine without lids being removed, alternatively the same piercers drain solvent deposits when required for desposal and a removable drip tray catches any paint, oil or other liquids which may be expelled from the container during the crushing cycle.

Features

- Safe and easy operation
- No electrical installation required
- Full height viewing window
- Robust construction
- Maintenance free
- Powder coat finish

Technical data

- Overall height 2020mm
- Overall width 665mm
- Overall depth 485mm
- Depth when door open 810mm
- Crusher time cycle 20 seconds (based on a 30 litre pail)
- Air requirements 215dm³/cycle @10bar/145psi

Can Crusher 5 litre bench top machine and Can Crusher 205 litre drum models also available.
